NEW PRODUCT INFORMATION

STEERING WHEEL HOLDER Pn. SA-015

Steering wheel holder is the product we have prepared for 3 years. When designing, we wanted to ensure compatibility with all known standards, and allow the setting depth and angle. ST-015 is a modular product that is using the modules to customize all types of Karts (MINI; KF, KZ ats.). SA-015 allows you to set the steering wheel from 0-20 degrees and level from X + (2x20mm). Angle adjustment is secured by screw M5. Manufacture in natural aluminum color and black.

Price 80 € (Not included TAX and transport cost)
